Aditya Chandiramani

Data analyst with hands-on experience across India, Congo, and remote fintech | BSc Management & Data Analysis · IIT Madras | BCA · NUV | Trilingual EN/FR/Hi India

Summary

Financial data tells a story; most cannot read it yet. I am pursuing a BSc in Management and Data Analysis at IIT Madras alongside a BCA at Navrachana University. Over the past two years, I have analyzed banking datasets in India, audited import records in the Congo, and built financial models for a CA firm in Vadodara. I translate messy real world data into actionable decisions. My toolkit: Python, Excel, SQL, and AWS Cloud Security. I thrive in both structured firms and frontier markets where data is rarely clean. Fluent in English, French, and Hindi, with working Spanish, which opened doors in Francophone Africa. Let us connect if you are building something data driven.

Experience

SkillFied Mentor

Data Analyst

May 2025 - July 2025 (3 months)

Analyzed a banking dataset of 40,000+ client records to identify term deposit subscription patterns, producing segmentation insights that informed retention strategy recommendations.

Built Python-based data pipelines (Pandas, Matplotlib) to clean and visualize financial time-series data, reducing manual reporting time by an estimated 30%.

Cross-analyzed healthcare survival data alongside financial datasets, applying consistent statistical methods across two unrelated domains, demonstrating adaptability in analytical approach.

BONAF

Data Analyst

May 2025 - July 2025 (3 months)

Pointe-Noire

Audited and cleaned import datasets for frozen goods shipments entering the Republic of the Congo, resolving inconsistencies across multiple supplier records to ensure customs compliance.

Designed Excel dashboards and visual reports used directly in operational decision-making, translating raw import figures into accessible summaries for non-technical stakeholders.

Operated in a French-speaking, frontier-market environment, navigating cross-cultural business norms and local regulatory requirements with no prior in-market experience.

Basant Nihalani And Co

Intern

December 2024 - January 2025 (2 months)

Vadodara

Developed forecasting models using Python (Pandas) and Excel to project financial trends from historical company data, directly supporting the firm's quarterly planning process.

Validated and reconciled datasets across multiple sources, ensuring data integrity before model inputs, a critical step in a CA firm where accuracy carries legal weight.

Delivered outputs used in client-facing strategic planning discussions, gaining early exposure to how financial analysis translates into business decisions.

SOCOTRANS

Intern

July 2024 - August 2024 (2 months)

Republic of the Congo

Supported logistics operations for a Congolese transport firm, managing compliance documentation and coordinating field operations across multiple active routes.

Participated in a government-led vessel inspection process, verifying documentation accuracy on behalf of the company : exposure to formal regulatory compliance at 19.

Worked entirely in French in an on-site, multilingual environment — building professional communication skills under real operational pressure.

Ste Topchine SARLU

Intern

December 2023 - January 2024 (2 months)

Republic of the Congo

Managed client accounts and supported sales operations for a Congolese import/export firm, communicating with suppliers and customers entirely in French across active commercial relationships.

Built and maintained Excel-based dashboards to track sales figures, stock movements, and import volumes, giving the team a cleaner visual picture of operational performance than the raw data allowed.

Handled bilingual (EN/FR) data entry and document translation across logistics and sales records, ensuring accuracy between supplier invoices, ERP inputs, and internal spreadsheets.

Education

Indian Institute of Technology, Madras

Bachelor's of Science, Management and Data Analysis · (January 2025 - May 2029)

Navrachana University

Bachelor of Computer Applications, Computer Science · (August 2024 - May 2028)

Lycee francais charlemagne

French Baccalaureate, Science · (2012 - June 2023)
